

PUBLIC/PRIVATE REGIONAL RESILIENCY (P2R2) COMMITTEE

January 18, 2019

MINUTES

The Public/Private Regional Resiliency (P2R2) Committee met on Friday, January 18, 2019 at 11:30am at the NEFRC Offices at 100 Festival Park Avenue in Jacksonville.

The following members and representatives were in attendance:

Chris Baynard, Liz Reynolds, Bob Taylor, Janette Wagner, Noah Ray, Dave Rogers, Alicia Somers.

Staff: Margo Moehring, Aaron Glick, Beth Payne, V. Christiansen.

Ms. Moehring welcomed everyone. Public comment was invited. This was Mr. Roger's first meeting. Minutes from the May 4, 2018 meeting were approved by consensus. Ms. Moehring provided an overview of the status of current action items, including the good news that funding has been received in support of the vulnerability assessment and associated community outreach. The group agreed to shift the HUD partnership item to the leadership category and the durable infrastructure item to the infrastructure category. There was consensus on convening to discuss how to build and retrofit now that the Pre-FIRM mapping is completed. Progress is being made on regional evacuation planning. The vulnerability assessment has been received in draft form. It was agreed that the "cost of doing nothing" analysis needs to be added to the assessment. Since the funding is in place for 2019, the group agreed that there should be focus on the assessment and related community conversation, and that a climate compact should be pursued once the community conversations have advanced. It was noted that the utilities and school facilities departments should be invited to the data sharing meeting related to the assessment. A need was expressed for a central place where data and initiatives links could be shared. There was discussion of using interns and or STEM students to do projects or outreach, and this was identified as an approach that will be useful even after the funding is gone. The group was reminded that small business is an important part of the audience. Facebook and Linked In will be useful in reaching this and other targeted audiences. There is a current effort to create a Resiliency Week in September in Florida.

Ms. Moehring will provide a poll to schedule the next meeting, in about 90 days.

Public comment was again invited. The meeting ended at 1:00 pm.
